		MAJ	OUT	COS	
Protection Time/ Temp.	1 Food Temp.				<p style="text-align: center; margin-top: 0;">The marked items represent Health Code violations and must be corrected as follows:</p> <p style="text-align: center; margin-top: 10px;">ROUTINE INSPECTION CONDUCTED THIS DATE</p> <p>All food handling is satisfactory at present time.</p> <p>13) Observed sanitizer in all the sanitizer buckets and sink @ < 200 ppm Quat. Always ensure that your Quat sanitizer is at least 200 ppm in concentration. Continue to monitor the solutions with test strips. Corrected during inspection.</p> <p>29) Observed excessive grease and dirt build-up in hard to reach places throughout the facility. Maintain floors in a cleanly manner at all times. Correct asap.</p> <p>36) Observed the pass-thru window is not automatically closing. This window is required to automatically close when not in use. This window doesn't have an air curtain over it, with compounds the problem of keeping flies out of the facility. This has been a recurring violation that has been cited over several years. The facility manager states that it was repaired briefly before the window mechanism broke again. The facility currently has a few repair parts, but they don't have all of the parts required to complete the repair.</p> <p>The facility has been given ample time to make the repairs, but it remains to be out of compliance. All future non-compliance with repairing this window will result in reinspection fees, and potential permit suspension.</p> <p>Repair window within 14 days.</p>
