

# What are Social Determinants of Health?

## Social determinants of health (SDOH)

*are the conditions in the environment where people are born, live, work, play, worship, and age that affect a wide range of health, functioning, and quality-of-life outcomes and risks*

## SDOH can be grouped into 5 domain:

Economic Stability – Education Access and Quality – Health Care Access and Quality – Neighborhood and Built Environment – Social and Community Context

The Siskiyou County Public Health Division works to address the SDOH in each of our programs, with health equity and inclusion at the center

### Ways which we are addressing the SDOH:

- Promoting health education
- Collaborate with partners to increase access to critical health services, such as vaccines and health screenings
- Advocate for the consideration of health impacts in local policies and initiatives
-
